

STRATEGIC PARTNERSHIP

We do more than create technologies. We build partnerships capable of turning technologies into reality.

NEMO Labs is open to discussions regarding strategic investment, joint research and development, technology partnerships, and long-term alliances.

We consider opportunities for collaboration with private investors interested in advanced technologies, emerging technology markets, and participation in shaping new areas of technological development.

Partnership formats with NEMO Labs may include, but are not limited to, joint technology development and advancement, the creation of pilot projects, research initiatives, commercialization of solutions, expansion into new markets, and investment participation in selected projects.

Selected NEMO Labs projects may be open to private investment, strategic partnerships, and co-development. Specific forms and terms of participation are determined individually within the framework of the relevant agreements.

Capital. Technology. Expertise. Opportunity.

Different resources. A shared future.

We are not looking for funding for the sake of funding. We are looking for partners capable of building technologies, markets, and the infrastructure of the future together with us.
